Introducción

En el presente documento se integra el **“Anexo: Tablas de Desagregado Municipal y por Entidades Federativas”** que complementa la información expresada en el **Segundo Informe Cuatrimestral de 2012 de la administración 2007-2013 del Gobierno del Estado de Jalisco** que encabeza el **C. Emilio González Márquez**.

Las tablas que componen este anexo han sido organizadas en torno a los cuatro Ejes de Gobierno contemplados en el Plan Estatal de Desarrollo vigente; “Empleo y Crecimiento”, “Desarrollo Social”, “Respeto y Justicia” y “Buen Gobierno”.

Este anexo detalla la ubicación y alcance municipal y estatal de las obras y acciones que documentan los avances planteados en el cumplimiento de las metas del presente informe. Adicionalmente, en las tablas por entidad federativa, se posibilita ubicar el estado que guarda Jalisco en el entorno nacional con respecto al indicador que se esté analizando.

Es importante asentar que estos desagregados sólo se presentan para aquellos indicadores que muestran información para este periodo y de los cuales, por su naturaleza, es posible establecer la focalización e impacto específico para Jalisco.

Para facilitar un análisis en el tiempo de la información se han incluido datos históricos (2007, 2008, 2009, 2010 y 2011) que dotan de una panorámica más completa del comportamiento de los indicadores relevantes. Además de lo anterior, puede visitarse el siguiente sitio: <http://seplan.app.jalisco.gob.mx/indicadores> en donde se desglosa a detalle la información puntual de cada uno de los indicadores.

Las obras y acciones registradas, así como el lugar de Jalisco a nivel nacional, constituyen una clara evidencia del avance de nuestro estado fincado en el trabajo y colaboración entre los distintos sectores de la sociedad y del Gobierno del Estado de Jalisco.

NOTA: No se incluyen las defunciones de residentes en el extranjero ni de otras entidades federativas, información en base a la fecha de la defunción y el lugar de residencia. La información de 2010 se considera como preliminar, sujeta a modificación por proceso de confrontación con INEGI. 2011: Por el proceso de validación y confrontación de las bases de datos de las defunciones entre la SSJ y el INEGI, las cifras del cierre del año estadístico se consideran como provisionales, hasta que el INEGI las publique como definitivas. Por este motivo, las cifras publicadas en el informe antes citado no coinciden con las actuales en la plataforma. Por la dinámica de la información de las tasas de mortalidad los valores de 2012 permanecen sin cambio hasta ser actualizados en diciembre de 2012. El periodo que se informa no debe ser utilizado para hacer comparaciones con los valores anuales, pues debe esperarse a cerrar la información anual para valorar el comportamiento del daño a la salud por esta causa.

NOTA: 2012: Información preliminar (semana 33). El total de egresos incluye a 5,046 personas que son residentes de otros estados y 185 en donde se ignora el municipio de residencia.

Se modificaron los valores históricos con la información correspondiente al cierre de cada año. Los valores estatales incluyen los egresos donde se ignora el municipio de residencia, además de las personas que fueron atendidas y que residen en otras entidades federativas, por ello, el valor estatal es mayor a la suma del desglose municipal.

NOTA: Para los años de 2006 y de 2007, el valor de este indicador se obtenía con las estimaciones para la entidad federativa realizadas por la Dirección General de Información en Salud con base en las proyecciones de población. A partir de 2008, se obtiene a través del Certificado de Nacimiento, el cual se registra en el Sistema de Nacimientos atendidos. (SINAC), en el cual si se tiene el registro por municipio de atención del nacimiento.

Información preliminar sujeta a modificaciones. (Semana 33). El valor relativo desciende cuando la atención del parto se realiza por personal no médico (enfermera, auxiliar de enfermería y partera, o bien otro personal distinto a los ya mencionados). Hasta el mes de febrero se atendieron 28 partos por este tipo de personal, 60 en marzo, 133 en abril, 178 en mayo mientras que hasta este mes aumentaron a 292.

NOTA: Información preliminar en proceso de validación y sujeta a modificaciones. (Semana 33). Estas defunciones han ocurrido en 96 municipios (76.8%) del Estado.

No se incluyen las defunciones de residentes en el extranjero ni de otras entidades federativas, información en base a la fecha de la defunción y el lugar de residencia. La información de 2010 se considera como preliminar, sujeta a modificación por proceso de confrontación con INEGI. 2011: Por el proceso de validación y confrontación de las bases de datos de las defunciones entre la SSJ y el INEGI, las cifras del cierre del año estadístico se consideran como provisionales, hasta que el INEGI las publique como definitivas. El total del estado incluye una defunción en la cual se ignora el municipio. Por este motivo, las cifras publicadas en el informe antes citado no coinciden con las actuales en la plataforma.

La suma de las defunciones registradas en el desagregado por municipio es menor que el valor de Jalisco para cada año, porque este valor estatal incluye las defunciones en las cuales se ignora el municipio de residencia.

NOTA: La actualización del indicador es trianual con base a los resultados de la aplicación de la prueba PISA. La información presentada corresponde a los resultados de las pruebas aplicadas en 2006 y 2009.

Las posiciones de los estados en la prueba PISA, se asignan por el puntaje obtenido en la misma. Al porcentaje más alto se le asigna la posición 1, y así sucesivamente. Cuando hay empate en el puntaje, en dos o más estados, se les da la misma posición, sin embargo el orden consecutivo de posiciones se rompe, quedando en apariencia algunas posiciones o lugares desiertos.
