Introducción

En el presente documento se integra el **"Anexo: Tablas de Desagregado Municipal y por Entidades Federativas"** que complementa la información expresada en el **Quinto Informe de Gobierno 2011 de la administración 2007-2013 del Gobierno del Estado de Jalisco** que encabeza el **C. Emilio González Márquez**.

Las tablas que componen este anexo han sido organizadas en torno a los cuatro Ejes de Gobierno contemplados en el Plan Estatal de Desarrollo vigente; "Empleo y Crecimiento", "Desarrollo Social", "Respeto y Justicia" y "Buen Gobierno".

Este anexo detalla la ubicación y alcance municipal y estatal de las obras y acciones que documentan los avances planteados en el cumplimiento de las metas del presente informe. Adicionalmente, en las tablas por entidad federativa, se posibilita ubicar el estado que guarda Jalisco en el entorno nacional con respecto al indicador que se esté analizando.

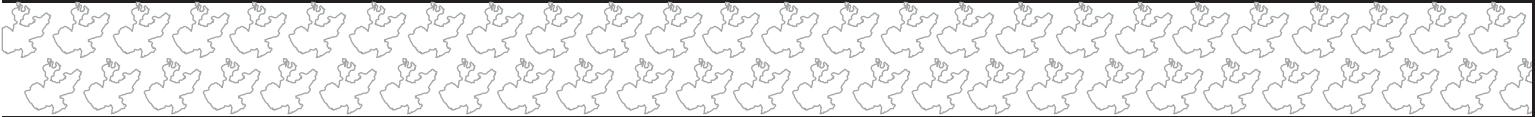

Es importante asentar que estos desagregados sólo se presentan para aquellos indicadores que muestran información para este periodo y de los cuales, por su naturaleza, es posible establecer la focalización e impacto específico para Jalisco.

Para facilitar un análisis en el tiempo de la información se han incluido datos históricos (2006, 2007, 2008, 2009 y 2010) que dotan de una panorámica más completa del comportamiento de los indicadores relevantes. Además de lo anterior, puede visitarse el siguiente sitio: <http://seplan.app.jalisco.gob.mx/indicadores> en donde se desglosa a detalle la información puntual de cada uno de los indicadores.

Las obras y acciones registradas, así como el lugar de Jalisco a nivel nacional, constituyen una clara evidencia del avance de nuestro estado fincado en el trabajo y colaboración entre los distintos sectores de la sociedad y del Gobierno del Estado de Jalisco.

NOTA: Los valores reportados se obtienen a partir del Inventario Estatal de Plantas de Tratamiento, el cual es dinámico en función de las plantas que se encuentran en operación, fuera de operación, de baja y en construcción. El estatus depende del momento en que se realiza la visita de campo. Asimismo, respecto al cierre de 2010 dejaron de operar algunas plantas de tratamiento por diferentes motivos, tales como falta de recursos en los municipios para cubrir los gastos de operación de las mismas.

NOTA: Para el año 2008 la suma del total de casos de dengue en sus dos formas es de 1,441 casos. En el total se incluyen 25 casos, en los cuales no se identificó el municipio de residencia, por lo que el desagregado de ese año sólo muestra 1,416 casos.

2011: Información preliminar sujeta a modificaciones (semana 52).

De los 173 casos de dengue, 8.1% (14 casos) corresponde a dengue hemorrágico. Del total, 52% son mujeres. Como resultado del estudio epidemiológico se reclasificó un caso del municipio de Zapopan como foráneo por residir en Nayarit. Hasta esa semana, los casos se han presentado en 26 municipios (20.8%) de Jalisco.

NOTA: Información preliminar, sujeta a modificaciones (semana 46).

Incluye Centros de Salud que fueron acreditados en mayo de 2006, por haber expirado la vigencia de la misma (que es por 5 años).

Por la dinámica del flujo de la información y la certificación de los centros de salud, estos son validados mediante el dictamen que hace la Subsecretaría de Innovación y Calidad de la Secretaría de Salud del Gobierno de la República. Los datos que se consignaron al corte de los años de 2007 a 2009 correspondientes fueron menores a los definitivos, por lo que a partir de este informe se actualizan.

NOTA: Se modificaron los valores históricos con la información correspondiente al cierre de cada año. Los valores estatales incluyen los egresos donde se ignora el municipio de residencia, además de las personas que fueron atendidas y que residen en otras entidades federativas, por ello, el valor estatal es mayor a la suma del desplegado municipal.

Durante 2011 se atendieron 160,942 egresos, de los cuales 4.1% (6,676) son residentes de otros estados y en 605 se ignora el municipio de residencia.

Información preliminar sujeta a modificaciones (semana 46).

Los valores reportados anteriormente en el año 2011 se han actualizado por modificaciones estadísticas de la SSJ, por lo que la información del cuatrimestre pasado no va a coincidir.

NOTA: En 2006 y 2007, el valor de este indicador se obtenía con las estimaciones para la entidad federativa realizadas por la Dirección General de Información en Salud con base en las proyecciones de población. A partir de 2008, se obtiene a través del Certificado de Nacimiento, que se registra en el Sistema de nacimientos atendidos (Sinac), en el cual sí se tiene el registro por municipio de atención del nacimiento.

Información preliminar sujeta a modificaciones (semana 46).

El valor estatal incluye la atención de pacientes donde se ignora el municipio de residencia (238). Se registra un total de 118,476 nacimientos atendidos, de los cuales 3.12% (3,703) son residentes de otros estados.

| Promedio de municipios | 65.5 | 100.75 | 75.5 |

NOTA: Para obtener el promedio por municipio, a diferencia del promedio del periodo, se calcula de la siguiente manera:

1. Se toman los valores máximos de cada estación del municipio para el día.
2. Se obtiene el promedio del día a partir de los valores del punto 1.
3. Se van obteniendo los valores promedio para cada uno de los días que componen el periodo en cuestión.
4. Se obtiene el promedio del periodo para el municipio a partir de los valores promedio del punto 3.

De acuerdo a lo anterior, el promedio de los desagregados municipales es diferente del valor presentado en el cuatrimestre.

NOTA: La actualización del indicador es trianual con base en los resultados de la aplicación de la prueba PISA. La información presentada corresponde a los resultados de las pruebas aplicadas en 2006 y 2009.

Las posiciones de los estados en la prueba PISA se asignan por el puntaje obtenido en la misma. Al porcentaje más alto se le asigna la posición 1, y así sucesivamente. Cuando hay empate en el puntaje en dos o más estados, se les da la misma posición, sin embargo, el orden consecutivo de posiciones se rompe, quedando en apariencia algunas posiciones o lugares desiertos.
